

Flight Cases

Our tough and rugged flight cases provide on the road protection for your valuable equipment. We offer both off the shelf and bespoke flight cases which can be designed and custom built to your exact specification. Trifibre custom designed flight cases have been used all over the world to transport and protect some of the most precious items in a wide range of industries and clients including Johnson & Johnson, Samsung, Fender, McLaren and Airbus.

Designed and Manufactured In-House

Our highly experienced and friendly team are able to offer good, honest advice, in order to ensure you end up with the best possible solution, taking into account price, size, weight and application. Trifibre supply bespoke cases to suit your individual requirements, from lightweight to heavy duty cases, we can provide the best possible solution for you.

Bespoke Casing Solution

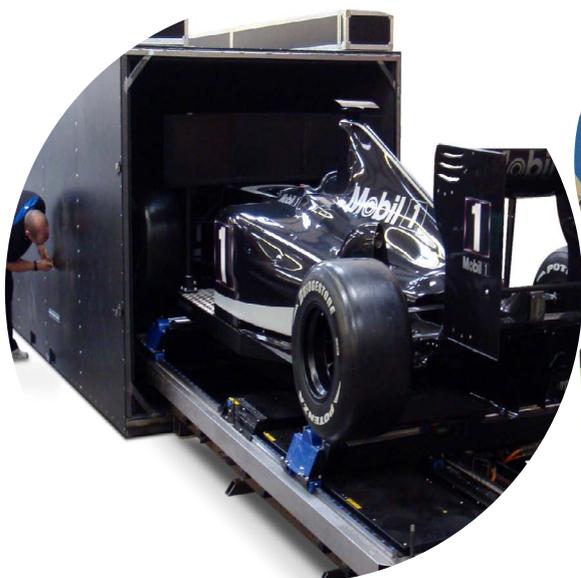

Our skilled in house design team use the latest CAD technology in order to create unique bespoke design solutions. A diverse range of accessories and features can be incorporated within the designs such as doors, hatches, lift out trays, pull out drawers, rack mount fittings, castors or even an electronic lift system for lifting a plasma screen out of the case. Cases can also be customised to match your corporate branding using our in house screen printing facilities.

Lightweight or Heavy Duty

If you require a lightweight and portable case, we may recommend an astraboard flight case construction with corner wheels and an extendible handle. Or if you require a large weight unit that needs to be easily removed from the case once it has arrived, we may recommend a heavy duty flight case with an integrated hinged aluminium ramp.

We are the UK's leading manufacturer of bespoke flight cases. All of our flight cases are manufactured in our UK factory.
