

Poly Cases

Poly cases are the ideal, stronger alternative to cardboard boxes, and a more cost effective solution than our flight cases. Tough, durable and splash proof, they are constructed from HDPE, and can be custom made to fit your individual specification. Poly cases are constructed with a welded steel metal frame around the top to give it a more rigid structure, and a variety of handles, shoulder straps, lid retainers, foam linings, custom made foam inserts and wheels can also be utilised - the options are endless!

Designed and Manufactured In-House

Our standard poly case starts out as a flat extruded sheet of HDPE between 1.3 and 2.0mm thickness

Bespoke Casing Solution

Our skilled in house design team use the latest CAD technology in order to create unique bespoke design solutions. A diverse range of accessories and features can be incorporated within the designs such as shoulder straps, wheels, buckles, hinges with metal padlocking draw bolts or key locks. Cases can also be customised to match your corporate branding using our in house screen printing facilities. As well as bespoke foam interiors for ultimate protection and presentation.

Lightweight and Medium Duty

While our cases are not a substitute or as hard wearing as our flight cases, they are ideally suited for light and medium duty applications and offer a great cost effective alternative to our custom built flight cases.

Our in house silk screen printing department allows us to offer corporate branding to your case.

Poly Cases are ideally suited for light and medium duty applications.
